End Panel Door Program (EPDR)

- End Panel Doors (EPDR) are decorative door panels that can be ordered as separate items and applied to the finished ends of Wall, Base, and Tall cabinets.
- EPDRs are made 3/4" deeper than the cabinet side.
 - Front edge of the End Panel Door covers the face frame.
 - Meets the edge of the door on the front of the cabinet.
 - The back edge of the End Panel Door is flat so that it butts up against the wall evenly.
- The front, top and bottom edges of the End Panel Door are detailed to match the edges of the cabinet doors based upon the cabinet series you are ordering.

Note! *Since the back edge of the EPDR is flat, these should not be used to wrap around islands and peninsulas. The EPDR is designed to be used as a decorative door panel on the sides of cabinets that butt up against a wall.*

You must designate **finished ends** for all cabinets that will be receiving the decorative End Panel Doors (EPDR).
